Imagine our surprise, disgust, and annoyance after reading the attached comments written by the setback committee. Once you read them for yourself, we are confident that you will concur that their behavior is totally unacceptable and possibly illegal.

We strongly urge you to review the situation, place an immediate cease and desist order upon the current committee, identify a new committee to begin the analysis over. It is obvious that the group is interested in succeeding with its own agenda and not interested in taking the high road to be ethical and above board.

My husband and I purchased our property, Lot1 Tin Cup Creek, over 13 years ago with the intention of building our retirement home in the near future. The proposed setback rules place a serious impediment to our hopes. We understand that we will lose 200 feet along our entire back property line since it touches the Little Tin Cup Creek.

We have been keeping informed by reviewing the meeting minutes and the updated setback rules drafts. Although we have written several notes, we have yet to receive a formal response from the committee, so it's apparent that the committee members are not interested hearing from us, the law-abiding land owners. They are also indifferent to the impact upon our quality of life, nor the negative impact to the value of the property should the new restrictions take effect and we elect to sell the parcel.

The courtesy of a response from one of you is requested. We have asked Chris Daniel, who thankfully has requested a special meeting with you, to share our thoughts as well. Thank you.
Sincerely,

Kristie and Eugene Kosaka

I have asked for a meeting with the commissioners regarding the actions of the SSC. If you have any questions about their actions please read their emails about public comments and participation.

I have been placed on the agenda September 30th at 2:30. Now is our opportunity to make a change in the make up of the committee. Please call or email the commissioners and demand the removal of the full committee.

Please attend this meeting it may be our only opportunity to make the necessary changes to protect our property rights.

Chris Daniel
